

IDEAS TO TRY AT HOME

Making small changes can make a big difference

save money on your water bill?

A Fulford resident collected information about their family's water useage:

“I already had a 100 litre water butt collecting raining water off my house roof, and my bill was

£59 a month in 2021.

I brought 2 more butts (210 litres at approx £60 and 100 litres at approx £40). In **2022 my bill was £40 a month, using 11m³ less.**

In **2023** my bill was **£33 a month,** using **45m³ less water per year**”

two 100 litre water butts

210 litre water butt

“In 2024 my bill was £34 a month, using 1m³ less a year than the previous year...

....saving almost £1000 for the cost of approx £100 over the past 4 years.

I use the water for watering the garden, washing bikes and the car, topping up the wildlife pond, watering house plants”

water butts available at many outlets including:
B&Q Hull Road & online at <https://evengreener.com/collections/water-saving>
